ABOUT ME

I have loved computers from a young age. At 9 I spent my break-times at school building computer games. At 13 I taught myself HTML and some basic C programming. After school I pursued a career in music where I inadvertently learnt some basic graphic design skills in Adobe; I still find this very enjoyable, I think it shares a lot with music: balance, space, contrast, direction of attention, symmetry and motif.

Other useful skills I learnt from the music industry are how/when to lead a team and how/when to support and serve a team. The industry also taught me tenacity, self-motivation, resourcefulness and grit. I learnt to work well under stress and how to be reliable and dependable.

EDUCATION

Harvard's CS50

Described by Harvard as teaching a robust understanding of computer science with an emphasis on problem solving. I learnt about algorithms, data structures and databases. The primary language was C and problem sets included building an encryption program, spell checker, image filters and a web app for buying and selling stocks.

CS50 Web Programming with Python and Javascript

Topics covered were database design, scalability, security, writing/using APIs, testing, UX/UI, Bootstrap, React and leveraging cloud services like GitHub and Heroku. Problem sets included recreating simplified versions of Wikipedia, Ebay and Facebook.

Self Study

Since these courses I have been continuing my learning everyday diving deeper into Javascript, React, Python and CSS. I have been building and deploying websites, problem solving and being self-reliant.

EDUCATION

CS50x

Harvard University 2020
12 week online course

CS50 WEB

Harvard University 2020
12 week online course

BA HONS Music Practice

ACM 2013-16 (2:1)

EXPERIENCE

Accomplish

I interned at www.accomplish.world. I helped them automate their benchmarking model, Helix.

“In a consulting capacity, Andy combined his technical know-how with broader strategic vision to help us see what a digital future would like for our business.” - Adam Grainger, co-founder.

LeavingCard.com

I am currently gaining work experience/mentorship at www.leavingcard.com where I have been learning about testing and OOD.

Please visit www.andylittleweb.com to view some of my personal projects and client work.
